John E. Kemper

Chairman and CEO

Profile

With over 35 years of diverse experience in the delivery of capital projects, John brings leadership and vision to KLMK and its clients. He is experienced in all aspects of project delivery, including project organization and launch, professional services procurement, scope, cost and schedule control systems, and coordination with regulatory approval authorities. Having previously worked for large A/E and construction management firms, John has a comprehensive understanding of the formation and collaboration of Project Delivery Teams that form the foundation of successful projects. This expertise assures clients of successful launch and implementation of complex healthcare projects.

A trusted advisor to many hospital CEOs, John thrives on the success that comes from developing collaborative relationships.
