

Patrick Duke, MS

Senior Vice President

Profile

When it comes to project delivery, Patrick is known for quality, client contact and team cooperation. As Senior Vice President, he serves as Regional Manager of the Mid-Atlantic. His focus is to ensure that all KLMK team members have the proper tools and time commitment to meet project requirements.

Patrick's technical strengths include program management, project team coordination, construction administration, design management, equipment coordination, and contract negotiation and administration. He enjoys working with diverse individuals and harnessing their talents to create value for his clients.
